ABOUT

I'm a 30-year-old developer and gamer. I studied biology at university but after that because of my interest in gaming, computer and technologies I started to self study web development and practiced many hours to learn front-end languages and started to work. In the 6 years of my development background, I always had much perseverance to make every project successful and perfect. Besides hard work, I'm always seeking new technologies and methods in the development field to improve myself and my knowledge.

WORK EXPERIENCE
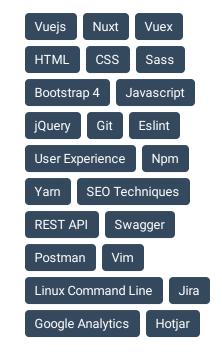

Front-end Developer
Sabacell
2019 - Present

- Worked in Agile-driven environment to effectively maintain project timelines and utilize available resources.

- Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.

Technologies used:

HTML 5 · CSS 3 · XHTML · Javascript · jQuery · Ajax · Git · User Experience · User Interface · Photoshop · Marketo · Jira

PRODUCT DESIGN

MafiaBuzz
Progressive Web App
2019 - Present

MafiaBuzz is a web application to set up and manage the "Mafia Party Game" easily. People can set up their game and choose multiple roles as a creator to start playing the game in a group of friends or family.

I just came up with this idea at June 2019 to create a web application for people who are playing "Mafia Party Game" seriously and have so much trouble to run and manage the game. I have started to design application's architecture and gather a team of Game Designer, Back-end Developer and Marketing Specialist to start developing the application. After 8 months of hard work we developed and released the application with all the functionality and in-game purchases to the market so people can start playing their game.

Technologies used:

Vuejs · i18n · Vuex · Vue-Meta · Vue-Router · Axios · PWA · HTML 5 · CSS 3 · Sass · Javascript · Git · Eslint · REST API

SKILLS & TOOLS

Vuejs · Nuxt · Vuex · HTML · CSS · Sass · Bootstrap 4 · Javascript · jQuery · Git · Eslint · User Experience · Npm · Yarn · SEO Techniques · REST API · Swagger · Postman · Vim · Linux Command Line · Jira · Google Analytics · Hotjar
